

### Corrections and clarifications for Chapter 1. *Datives as applicatives*

1. *se* glossed as CL.REFL NOTE: if the gloss 'CL' is not acceptable, change instead to REFL
2. *le* glosses as CL.DAT NOTE: if the gloss 'CL' is not acceptable, change instead to DAT.3SG

The places where this change should be implemented are highlighted in yellow.

#### 3. - Note received from editors:

All items in the source line should have a corresponding gloss. So, in the Cuervo chapter, we find

A Emilio  
Emilio

This should become

A Emilio  
to Emilio

or

A Emilio  
DAT Emilio

or any other appropriate gloss for "A".

Response:

*a / à* (when its gloss is highlighted in yellow) glossed as DAT

The places where this change should be implemented are highlighted in yellow.

4. Typos, clarifications, etc., appear marked directly in the pdf. Please, open the Comments List, so all marking is easy to see.
5. A few changes were directly done as Edit Text in the pdf.
6. I noted that citations for chapters of this volume are not hyperlinks. I wonder if this is ok.
7. There are some inconsistencies in whether parenthesis in citations are part of the hyperlink or not.

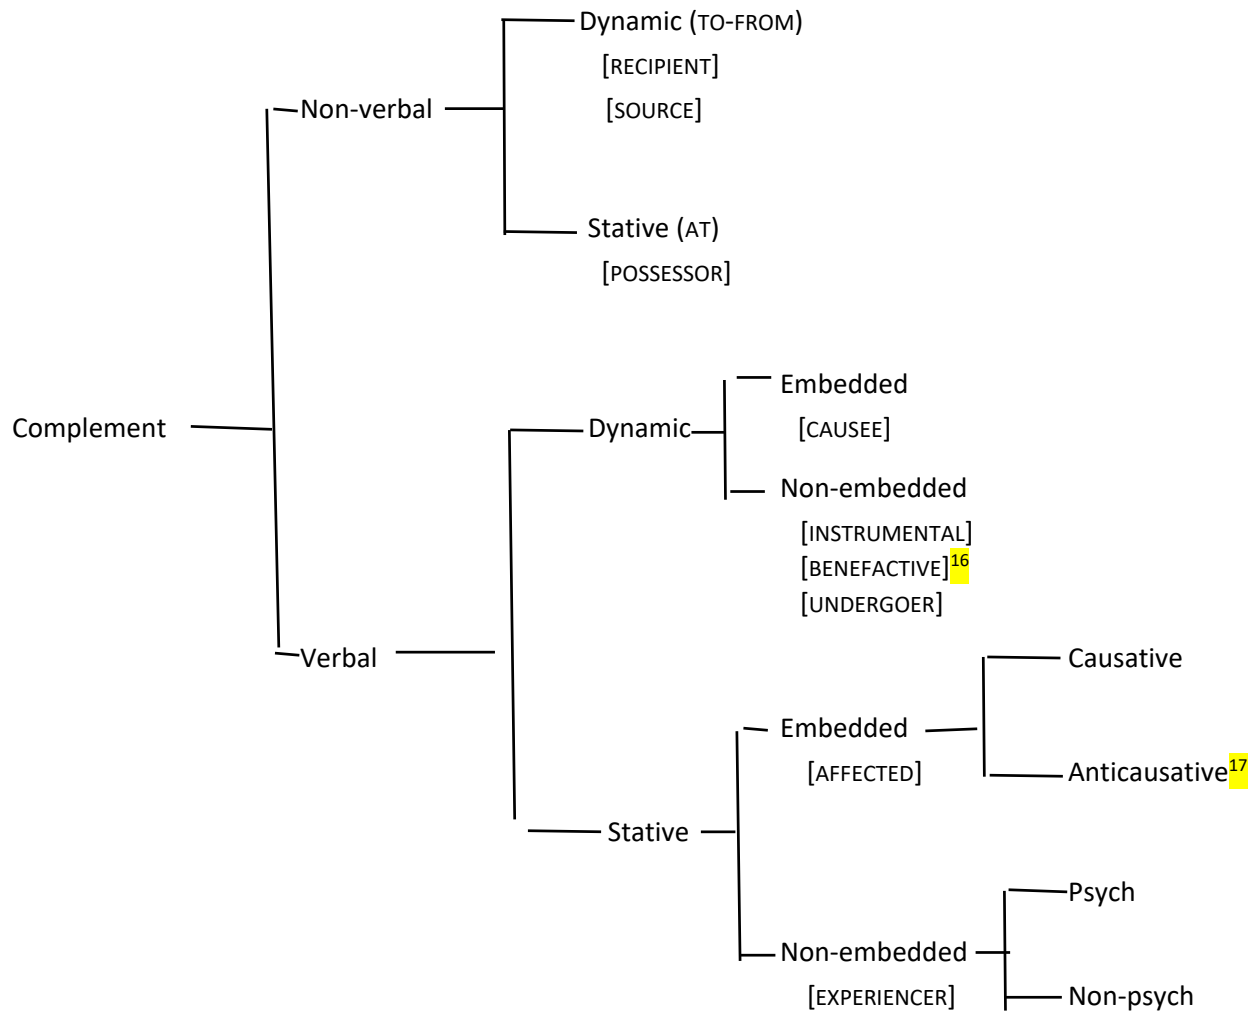

Figure 2.

Please, make sure there is alignment that corresponds to the levels. Horizontal lines should go either 1) to centre of vertical line, or 2) centre of category word in regular font (e.g., Verbal, Stative, Anticausative).

Words in small caps in square brackets ([INSTRUMENTAL], [POSSESSOR]) should be slightly indented from the category they belong to (the category word above them).

There are two footnotes in the figure, #16 and #17.
